

*A1*

1. (Amended) A sprayable composition for improving substrate characteristics, the composition comprising:
  - i) greater than about 3.0% by weight of at least one substrate enhancing agent selected from a C<sub>7</sub> or higher monohydric alcohol; and
  - ii) greater than about 5.0% by weight water.

*A2*

4. (Amended) The composition according to claim 1 wherein the monohydric alcohol is tallow alcohol.

*A3*

7. (Amended) The composition according to claim 1 wherein the substrate enhancing agent is a monounsaturated or polyunsaturated C<sub>7</sub> or higher monohydric alcohol.

*A3*

8. (Amended) A method for reducing wrinkles, shape distortion or both from a substrate comprising the steps of:
  - (a) contacting the substrate with a sprayable composition comprising:
    - (i) greater than about 3.0% by weight of a least one substrate enhancing agent selected a C<sub>7</sub> or higher monohydric alcohol; and
    - (ii) greater than about 5.0% by weight water;
  - and
  - (b) allowing the substrate to dry.

*A4*

10. (Amended) The method according to claim 8 wherein the monohydric alcohol is tallow alcohol.

*A5*

13. (Amended) The method according to claim 8 wherein the substrate enhancing agent is a monounsaturated or polyunsaturated C<sub>7</sub> or higher monohydric alcohol.
